

CLASSOBJECT.CS

ClassObject.cs

```
Student s1 = new Student();
```

```
s1.Name = "Ritesh";
```

```
s1.Age = 21;
```

```
Console.WriteLine("Name: " + s1.Name);
```

```
Console.WriteLine("Age: " + s1.Age);
```

```
class Student
```

```
{
```

```
    public string Name;
```

```
    public int Age;
```

```
}
```

Output:

Name: Ritesh

Age: 21
