

Financial Forecasting

Objective

Predict the future financial value using Recursion.

Concepts Learned

- Recursion
- Mathematical Calculations
- User Input
- Function Calling
- Base Case and Recursive Case

Algorithm

1. Read current value.
2. Read annual growth rate.
3. Read number of years.
4. Use recursion to calculate future value.
5. Display predicted value.

Time Complexity

$O(n)$

Space Complexity

$O(n)$ (Recursion Stack)
